PROFILE

Solo Founder & Software Engineer specializing in **React**, **Agentic AI**, and **LLM function calling**. Architected **Cyberia Space** for **50+ early adopters**, optimizing for low-latency UI and data visualization. Expertly combines **React architecture** with **AI orchestration** to build autonomous software and solve complex business challenges.

PROFESSIONAL EXPERIENCE

Cyberia AI Studio, Founder & Lead Engineer

09/2025 – Present

- **Product Architecture:** Architected "Cyberia Space," a productivity platform unifying Canvas, Kanban, and Calendar views into a single, high-performance data layer.
- **Agentic AI Dev:** Developed "Oracle" an autonomous AI system utilizing **LLM function calling** and **structured system prompts** to execute workspace actions—such as analyzing files and generating tasks—based on real-time user context.
- **Performance Engineering:** Built a sync engine using browser IndexedDB and secure cloud synchronization for cross-device persistence.
- **Growth:** Scaled the platform to **50+ early adopters** by managing the full product lifecycle and community feedback loops.

Freelance Software Engineer,

02/2024 – 09/2025

Self-Employed (keywords: Laravel, PHP, Docker, MySQL, REST API, React)

- **Full-Stack Delivery:** Architected and deployed custom web applications for diverse clients, focusing on automating manual business workflows and improving data visibility.
- **FIDO Dashboard:** Developed a specialized fee management platform for accountants; automated reporting workflows that reduced financial data processing time by 30%.
- **Client Relations:** Maintained strong client relationships by translating business requirements into technical roadmaps and providing ongoing maintenance and scaling support.

Kamioun, Intern & Part-time DevOps Engineer (keywords: Magento, PHP, AWS,

01/2023 – 01/2024

CI/CD, Docker, Grafana)

- **System Automation:** Containerized the Magento app with Docker and automated workflows, improving development efficiency by 25%.
- **CI/CD Pipeline:** Built a CI/CD pipeline on GitLab CI, streamlining deployment processes.
- **Quality & Monitoring:** Integrated SonarQube and Grafana, enhancing code quality, scalability, and performance monitoring.

PROJECTS

Cyberia Space – AI-Agentic Unified Workspace SaaS [🔗],

keywords: React, TypeScript, Framer Motion, Zustand, IndexedDB, Supabase, AI Integration, Realtime Sync

- Developed a high-performance productivity platform that unifies Canvas, Kanban, Calendar, and Directory views into a single data layer.
- Architected "Oracle AI" an autonomous Agentic AI that moves beyond chat to actively read files and reorganize the workspace.

FIDO – Professional Fee Management Platform for Accountants [🔗], keywords: Laravel, PHP, SQLite, Docker, Github Action

- Architected and built the entire end-to-end platform to align with accountants' workflows through continuous feedback.
- Reduced financial data processing time by 30% and report generation time by 40% through automated reporting.

EDUCATION

EUR-ACE ESPRIT: Private School of Engineering and Technology,

2024 | Ariana, Tunisia

National Engineering Diploma in Computer Science

ISI: Higher Institute of Computer Science,

2020 | Ariana, Tunisia

National Diploma in Embedded Systems

SKILLS

Infrastructure & Hosting

GitLab-CI, GitHub Action, Docker, Kubernetes, AWS, Vercel

Management & Version Control

Git, Jira, Linux, Bash, MySQL, PostgreSQL, SQLite

Fullstack Development

React, Serverless API, Supabase, Payment Gateways, Auth, RLS

AI Integration

OpenAi/OpenRouter SDK, Token Management, Structured Outputs, Tools Calling

LANGUAGES

Arabic — Native • English — Professional • French — Professional
